

Summer Term 2022

Year 1

Year 1 is taught by Miss Kenny and supported by Miss Fowler and Mrs Brayshaw.

English

In English, we will begin the term by embedding previously taught skills and applying them to a range of writing genres including letter writing, poetry and non-chronological reports. During the summer term, we will revise all the phase 5 phonics sounds and continue to use them within our writing and identify them when reading. Please continue to encourage your child to use these skills when they are reading and writing at home.

Maths

In Maths, we will continue to consolidate all previous learning, especially number facts such as addition and subtraction facts to 20, number bonds and counting in multiples of 2, 5 and 10. We will further our understanding of doubling and halving to learn about multiplication using the array method and division through sharing. Then these new ideas will be applied to a range of mathematical problems to develop our mathematical reasoning as we explain our answers and working out. In addition to this, we will begin to look at multiplication and division, fractions and representing data using graphs and charts.

Multiples of 5				
5	10	15	20	25
30	35	40	45	50
55	60	65	70	75
80	85	90	95	100

Science

In Science, we will continue to learn about plants, especially the common plants that we see around us in our local environment. We will learn about a range of plant types and explore what plants need to survive. We will also revisit and extend our learning about materials, grouping and classifying, investigating properties and carrying our fair tests.

Topic

Our topics for this term are 'Significant People' and 'What is the geography of my local area?'. We will begin by discussing a variety of historical figures and investigating what makes them significant. We will make comparisons between people from explorers of the past and in the modern day world. After the half term holiday, we will start to investigate our local area and examine the human and physical features of the area. We will also develop our understanding of key geographical terms and use some mapping technology.

RE

In RE, we will be learning about baptism and linking this to the idea of 'belonging' to different groups. We will re-enact a baptism in the classroom, discussing the meaning of each part of the ceremony.

We will then explore ceremonies from other faiths that focus on 'belonging' and make comparisons between these different ceremonies. Also in RE, we will explore the question 'What is a Saint?' by discussing our ideas and taking other ideas from a range of sources.

Music

Children will explore timbre, tempo and dynamics. They will perform a chant and change their voices to describe different feelings eg hot, tired, sad. They will select and layer sounds for an accompaniment to a song and create musical interludes to perform with the song 'Noah's Ark'.

PE

With the Sports Coaches, the children will be focussing on improving their understanding and skills through a range of sports.

Helpful information:

Reading books – Please bring them every day, with reading records so children can read in school. Books will be collected in on a Wednesday for changing.

PE – Week A - Tuesday and Wednesday.
Week B – Tuesday and Friday

Spelling test – Friday

Homework:

Reading – everyday, please sign your child's reading record each time they read with you.

Spellings – short practice every day.

Other homework will be issued on a Friday to be back in school by the following Wednesday.
